

Yulia Edomskikh

Senior Data Analyst / Data Engineer

Korolev, Moscow Region | +7 967 208-01-43 | @JuliaPhe | uedomskikh@gmail.com | English C1

PROFILE

Senior data professional with 22+ years of overall experience and 13+ years in analytical and data-focused roles. Strong background in SQL, DWH, ETL, BI, Python automation, data quality, and business-facing analytics. Recently focused on applied AI/LLM systems, RAG pipelines, A/B testing, and practical ML workflows where data preparation, evaluation, monitoring, and business metrics are critical.

RELEVANT STRENGTHS FOR ML ENGINEER ROLE

- Advanced SQL and data modeling: MS SQL/T-SQL, PostgreSQL, CTEs, window functions, procedures, views, performance tuning, execution plans, indexes.
- Python for data and automation: pandas, NumPy, SQLAlchemy, Requests, Selenium, Scikit-learn basics, SciPy/statsmodels, API integrations.
- Applied ML/AI: feature preparation, model evaluation, A/B testing, metrics design, RAG, embeddings, vector search, BM25, cross-encoder reranking, LangChain, LangGraph.
- Data engineering: DWH/ETL, Airflow pipelines, data marts, data quality checks, documentation, Git/GitLab, Docker basics, Kafka concepts and prototypes.
- Production mindset: clear decomposition, logging, configuration, validation, typing/docstrings where useful, code review, reproducible pipelines.

EXPERIENCE

Freelance - Data Scientist / AI and Data Projects

October 2025 - Present

- **RAG Support Assistant:** hybrid search pipeline with BM25, vector search, cross-encoder reranking, context assembly, answer generation, and auto/human/retry routing.
- **AgentFlow:** real-time data platform concept for AI agents: Kafka to Flink to Iceberg to FastAPI, semantic catalog, NL-to-SQL, data quality monitoring.
- **AB Test Designer:** sample size, MDE, statistical power, experiment risk analysis, metrics recommendations; React/TypeScript frontend, FastAPI backend, SciPy/statsmodels.
- **GraceKelly:** multi-model LLM orchestration, prompt variation, dependency graph decomposition, API service design.

International Auto Parts Holding - Lead Analyst

May 2022 - September 2025 | Moscow

- Designed and implemented a dynamic pricing system from requirements to production SQL logic: T-SQL procedures, views, functions, triggers, exception rules, monitoring and Power BI reporting.
- Built and maintained DWH/ETL data marts for sales, stock, margin, categories, pricing and management reporting; integrated internal systems and APIs.
- Refactored legacy T-SQL logic and improved performance of key processes by about 30%; worked with execution plans, indexes, hints and blocking analysis.
- Created SQL tools for business users, DDL/DML logging, parsers, automated checks and recurring analytical exports.
- Created PoC prototypes with LangChain, LangGraph, Ollama and RAG for internal process automation.

1520 Group - Lead Specialist, Data and Automation

September 2012 - September 2021 | Moscow

- Automated tender monitoring and reporting, designed ETL processes, prepared analytical conclusions and business documentation.
- Built tools for text document comparison and conditional notifications using SQL, PostgreSQL, Python and Excel.

Nestle, Sony, Axel Springer Russia, Argumenty i Fakty, Hotel-Line

January 2003 - August 2012 | Marketing, procurement and financial analysis roles

TECHNICAL SKILLS

SQL, MS SQL, T-SQL, PostgreSQL, ClickHouse, Greenplum, DWH, ETL, Apache Airflow, Apache Kafka, Python, pandas, NumPy, SciPy, Scikit-learn basics, SQLAlchemy, Requests, Selenium, API, REST, Power BI, DAX, Excel, Docker, Git, GitLab, UML, LangChain, LangGraph, RAG, vector search, A/B testing, statistical analysis, Scrum.

EDUCATION AND COURSES

- 2008 - Plekhanov Russian University of Economics, MBA Integral, Corporate Marketing.
- 2002 - Plekhanov Russian University of Economics, Finance and Credit, Financial Calculations and Analysis.
- 2025 - ClickHouse, Greenplum, AI/LLM Application Development, Stepik.
- 2022 - Data Analysis and Data Science, Yandex Practicum.
